

JOB DESCRIPTION

DumontJanks, a leading interdisciplinary planning & design firm, seeks an entry-level landscape architect to join our collaborative team. Our work focuses on universities, urban redevelopments, healthcare, waterfronts, and public plazas throughout the US. We are looking for a landscape architect with 0-3 years experience to participate in a wide range of projects at multiple scales. The ideal candidate will be team-oriented with excellent technical skills, an interest in big ideas, and a commitment to creating culturally-relevant projects from conception through execution.

Responsibilities:

- Work collaboratively on both planning and landscape architecture projects as part of a multidisciplinary team consisting of landscape architects, planners, architects, and urban designers
- Work directly with the Project Landscape Architect or Architect, to engage in all aspects of the design process including analysis, exploration of conceptual ideas, design development, documentation and construction administration
- Assist in preparation, coordination and completion of construction documents
- Develop creative and innovative technical solutions to complex design problems
- Assist in marketing efforts

Qualifications:

- Creative, self-motivated designer with a passion for the public realm, a desire to build high-quality landscapes, and an understanding of landscape sustainability / ecology
- Team player with flexibility and resourcefulness, who thrives in a collaborative environment
- Capability to effectively communicate design ideas both graphically and orally, and to contribute to the development of design concepts
- Strong communication, collaboration, and organizational skills
- Bachelor's or Master's degree in Landscape Architecture from an accredited program
- Previous experience (1-3 years) at another landscape architecture firm preferred, but not required
- Capacity for project-related travel
- Exceptional graphic skills and proficiency in CAD, Adobe Suite, Rhino, and SketchUp is required; experience with 3dsMax, V-Ray, Grasshopper, and GIS software preferred

To apply, please submit a cover letter, resume and work samples in PDF format not exceeding 20mb to:
