

GREGORY JANKS

Gregory blends strategic, financial, and physical considerations in holistic problem solving through rigorous analysis and design excellence. He focuses on campus frameworks and master planning, strategic planning, financial planning and resource allocation models, academic planning, space use analysis and programming, academic medical centers, student and residential life, and how data can best support decision making.

His award-winning collaborations with over 100 colleges and universities range from large public research institutions like The Ohio State University, Pennsylvania State University, Purdue University, University of Florida, University of Iowa, University of Nebraska, University of Texas, and University of Virginia through private schools like Brown University, Colgate University, Dartmouth College, Georgetown University, Harvard University, Johns Hopkins University, and University of Pennsylvania, to community colleges across the country, and several state-wide systems, including the creation of a strategic framework for public higher education in Massachusetts.

His writing and talks are regularly featured by organizations like the Association of College and University Housing Officers – International (ACUHO-I), National Association of College and University Business Officers (NACUBO), and Society for College and University Planning (SCUP).
